*The new
ineo i-Series*

Print technology that just works so you can get on with work

With technological, social, environmental and generational shifts impacting on work priorities, the workplace of today is evolving. And so too is the DEVELOP ineo i-Series of multifunctional printers (MFPs). The enhanced ineo i-Series offers a range of new features and combines ease of use with powerful security for a print solution without compromise. Empowering employees to achieve their objectives and helping them thrive.

All-round simplicity

The ineo i-Series devices come with an intelligent automatic media sensor, a clear, customisable user interface, the ability to group apps, and rapid troubleshooting with remote support. Your business will benefit from improved output quality, reliable paper feeding, and increased device availability – helping everyone get more done every day.

Powerful security

From advanced virus protection with clear notifications and status reporting, to proactive security management that detects (and can even predict) threats, you'll have peace of mind as standard, knowing your information and your business are safe and secure.

Ready for the best of both worlds?

Security AND simplicity. They're built into the new DEVELOP ineo i-Series to give you the best of both worlds.

Simple + a lot more

- **User-friendly experience** – enjoy using an updated, intuitive and logical user interface that offers flexible customisation options
- **Your apps at your fingertips** – organise apps on the ineo i-Series user interface for rapid access to the functions you use the most
- **Cloud ready** – take advantage of seamless integration with popular cloud applications directly from the user panel
- **Productivity boost** – the enhanced intelligent media sensor automatically detects the paper type to maintain an increased productivity
- **Higher availability, lower costs** – remote and predictive maintenance help maximise device availability and reduce the possibility of issues arising, saving costs and maximising uptime

Secure + a lot more

- **Proven protection** – against viruses, malware, cyber-attacks and unauthorised access with tried-and-tested security built in
- **Prevent problems before they happen** – once a device is secured, it stays secure; with ineo SECURE services, we've made sure your business is fully protected by providing security tailored to your needs
- **Visibly secure** – advanced virus protection, with clear notifications and status reporting that let you decide how to process jobs
- **Compliant** – no concern for data privacy standards – can easily be set up to be fully compliant with European legislation (GDPR)

SIMPLE

The device that has it all

With a clear, logical interface and flexible customisation options that adapt to your needs, the updated i-Series range delivers an intuitive user experience that helps boosting productivity.

Flexible customisation

- The new i-Series offers an intuitive smartphone-style experience that's so familiar, there's practically no learning curve. Users can customise their screens in the same way as their mobile devices, and put the apps they use regularly on the home screen for quick access.
- In the Quick Copy screen, users can see all the main setting options without scrolling or searching. They can apply their desired settings with fewer clicks and pop-ups, helping them to work more efficiently and be more productive.
- Users can customise their personal home screens by adding or removing function icons, and group apps in the way that works for them. A user can, for example, group all scan-related apps or all ID-related (ID copy and ID scan) apps.
- Widgets – similar to the Widgets on Android phones – are also supported, enabling users to embed app-delivered functionality on their home screens.

Cloud ready

- Directly from the user panel, you can set up seamless integrations with popular external cloud apps – such as SharePoint Online, OneDrive, OneDrive for Business, MS Teams, Google Drive, Dropbox and Box.com – to meet your needs and maximise your productivity.

Enhanced accessibility and usability

- Our devices are designed with high usability in mind. We follow industry-leading universal design guidelines to make them accessible to anyone regardless of age, experience, body size or special needs.
- We use colour and colour-coding to make things easy to use and keep users safe. Paper trays and toner cartridges are easily accessible for refilling, and the automatic document feeder can be lifted with little physical effort and silently closed thanks to hinges with soft-close.
- With a 24° to 90° tilt angle, the large 10.1" tablet touch panel provides convenient operation for all users, whether standing or sitting.

Boost your office devices

Did you know you can enhance your office devices with powerful cloud services, without worrying about compromising the security of document handling?

DEVELOP Marketplace, our pre-installed app and service store, has everything you need. It lets you find and download apps, add-ins and connectors – including third-party authentication apps and connectors to cloud repositories – straight from any ineo office device. So you can enhance the device with additional features that streamline every-day work, and create customised user interfaces to meet individual needs.

Powerful cloud connectivity

Simply connect your office printer to popular cloud services like SharePoint Online, OneDrive, Google Drive or MS Teams for basic file/folder operations, scanning to cloud repositories and selecting files for printing – directly from the printer panel.

Visible security

You want to be sure your office printer handles files securely and is protected against potential security threats. You can stay safe and monitor security settings with ineo SECURE Notifier, directly visible on the panel of your printer.

Personalised user experience

Tired of not finding the printer functions you want? With MarketPlace, you can create a personalised user interface with the design and features that fit your workflows and put the features you need the most on the control panel. The user interface can also be adapted to reflect your company's branding by, for example, adding a background image containing your company's logo and graphics.

Discover how DEVELOP MarketPlace can help you enrich your daily business activities with powerful apps and services – directly from your ineo device: developmarketplace.com

MarketPlace

Smart security to keep your business safe

Nothing matters more than the security of your vital business data and the challenge with print security and its infrastructure is twofold – protecting the devices and protecting the data and documents that they output.

With our new ineo i-Series you can rest assured that your devices, data and documents are secure. Numerous security features are built into our devices, supported by industry-leading antivirus technology from Bitdefender®. And with ineo SECURE Notifier you're on top of it all, making sure your ineo devices stay secure over their entire lifetimes.

Only 19% of organisations are completely confident in the security of their print infrastructure, this rises to 26% amongst organisations using Managed Print Services.

Overall, a further 50% say they are mostly confident. This reflects the growing complexity and challenges associated with securing both devices and documents across a hybrid workplace.

ineo SECURE Notifier

ineo SECURE Notifier lets you monitor the security settings over the lifetime of each ineo device on-premise. Available via the DEVELOP MarketPlace, the ineo SECURE Notifier app runs on your device and shows you it's secure. With the latest widget technology you can identify the security status at a glance on the home screen. The app also proactively informs you if a setting has been changed.

ineo SECURE service offers a range of levels so it can be tailored to your needs:

ineo SECURE

- Protects the data in the memory of your i-Series device
- Protects your i-Series from cyber attacks using data encryption
- Ensures files are stored only for usage, and are deleted in a timely manner if not used

ineo SECURE Platinum

- Secures the network settings of your devices and guards against unauthorised access
- Allows you to disable unwanted and unnecessary protocols and ports
- Ensures the right certificates are in place for use
- Lets you keep track of what's happening on your MFP by enabling the right logs

ineo SECURE Ultimate

- Provides evidence of all activities and processed information, ensuring an audit trail suitable for security purposes
- Provides comprehensive protection for your ineo device against the threat of viruses with our virus scanning solution supported by Bitdefender®
- Secures operations regardless of user and their location
- Notifies your IT admins if a virus is detected

ineo Navigator

Get a quick overview about the different functions of your ineo systems with online learning sessions – everytime and everywhere.

After purchasing one or more DEVELOP multifunctionals, ineo navigator helps you improving your time management and efficiency. By taking advantage of the online training sessions, everyone in the team can get to know the new device quickly and explore the entire range of functionalities in their own time. Guided by comprehensive explanations, easy and efficient operation is thus guaranteed.

Copying, printing, scanning and faxing: the explanations are clearly structured but flexible! You can watch the sequences consecutively or navigate freely between topics. What's more, without being bound by time or location, because you can log in to the navigator portal anytime and anywhere via the internet.

Benefits

- Gives inexperienced users a quick overview on the workings of the new system generation
- Every user can complete the training independently on his own computer
- Access is available anytime and as long as needed
- No dependency on hotlines
- No external instructor required
- No unproductive waiting time

Want to optimise your workflows?

Many everyday office jobs – printing, copying, scanning or managing documents – are routine tasks. The best way of saving time in document production and management is to simplify and automate work processes. That is precisely what the wide range of software applications DEVELOP offers can do for you – while at the same time making your office life simpler.

Document management made easy

By digitising paper documents and then automating and efficiently managing your document workflow you can boost office productivity. DEVELOP's document management software tools have been designed to achieve this goal.

System individualisation for enhanced efficiency

Tailoring office devices to the users' specific needs is good for your business. That's because system individualisation speeds up work procedures and streamlines office workflows. We offer you various software tools to individualise your ineo systems.

Managing print jobs to improve results

As printers become more sophisticated with ever more functions, managing print jobs easily and effectively has become increasingly business-critical. DEVELOP's software applications portfolio contains a wide range of tools to facilitate print job and colour management.

Simplified system administration

How can office devices be efficiently and conveniently administered in your networked environment? Software tools from DEVELOP ensure you or your network administrator can easily manage devices, control costs, keep data secure and enjoy remote support.

User authentication puts you in control

Designated user access and user accounts help you control who prints what and where, while preventing documents from falling into the wrong hands through unauthorised access to office devices.

Accounting facilitated

Printing costs can escalate if no controls are in place. DEVELOP has software tools to help you keep those costs under control – at all times and for all users.

Remote services: instant support with instant access

To make the ineo i-Series work better for everything you do, we set out to rethink everything we do.

We implemented the Remote Service platform, which ensures trouble-free operation and maximises device uptime.

To keep things running smoothly, i-Series devices intelligently collect data for self-diagnostics and remote maintenance, and even predict the optimal replacement time for parts and consumables – without unnecessary engineer visits or business interruptions. You can expect system uptime improvements, as well as a reduction in security risks through the initial secure configuration and required maintenance updates.

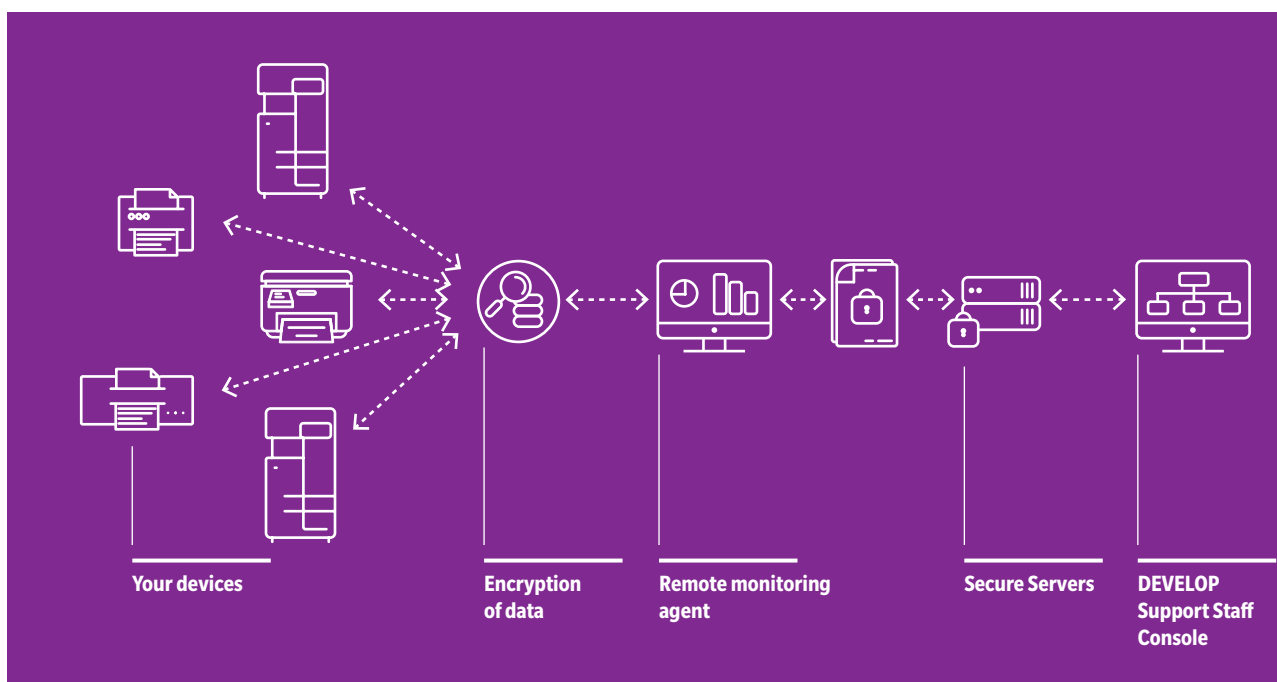

Your benefits:

- Fewer calls to the service desk
- Reduced need for onsite engineer visits
- Maximised device uptime
- Devices that are always up to date

HOW A REMOTE CONNECTION WORKS

You can rely on our Remote Services – they offer you assured security: all data is encrypted end-to-end, ensuring totally safe communication.

Industry-leading environmental performance

We develop and manufacture our devices with the objective of continually reducing their environmental impact at every stage of the product lifecycle: design, production, supply chain and transport, through to usage and recycling or disposal.

Every lifecycle stage is carefully monitored in terms of general input-output analysis, energy and resource efficiency, recycling and waste prevention – as well as compliance with relevant environmental and safety regulations.

Procurement:

- Reduction in number of parts
- Use of recycled materials
- Prohibiting use of hazardous substances

Manufacturing:

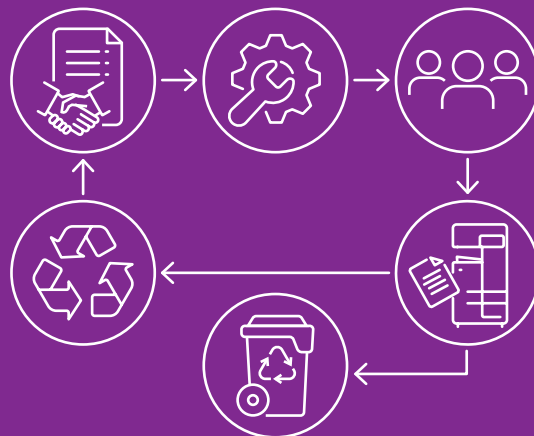

- Energy and resource conservation
- Use of renewable energy
- Product compactness
- Waste reduction

Logistics & Sales:

- Optimisation of logistics
- Compliance with transportation standards
- Reduction in and recycling of packaging materials
- Appropriate labelling

Recycling:

- Easier disassembly and recycling
- Implementation of recovery programmes

Disposal:

- Easier disassembly
- Prohibition of use of hazardous substances

Product use:

- Energy and resource conservation
- Extension of product life
- Ensuring safety during use
- Appropriate labelling and information

We've made substantial investments to keep the environmental impact of the ineo i-Series as low as possible.

Minimised power consumption

With system settings like low power mode, sleep mode, power-saving fax/scan mode, and further functions like timer and calendar, dynamic eco timer, eco print and eco info, you can significantly reduce the power consumption of your ineo devices.

Recycling technology to upgrade material properties

We have developed a recycling technology that can upgrade material properties, enhance the strength and flame retardancy of waste plastics, based on a polymer alloy technology accumulated through the development of toner. This technology allows recycled plastics to be used for parts covering 88% of the entire surface area of the MFPs.

Polymerised toner

With the polymerised toner used in the ineo i-Series, we've reduced the fixing temperature by about 15°C compared to previous models. Combined with a new fixing device, this helps to significantly reduce the TEC Value*.

Improved product design

Our devices are designed to be smaller and lighter, saving both raw and packaging materials, as well as greenhouse gas emissions during transport.

Improved packaging

We developed lighter, more compact air cushions that have reduced the device packaging volume by 84% and the packaging weight by 70% compared to conventional polystyrene foam cushioning materials.

Less noise for a more comfortable working environment

We've taken steps to reduce the noise level during operation, which makes working near our devices even more comfortable.

LED as the scanner light source

We've changed the light source for the scanners in our devices from conventional fluorescent lighting to LED. This delivers power savings and a low heat performance while increasing brightness intensity and scanning speed.

* The TEC value represents an electrical product's typical weekly electricity consumption (TEC) based on average office use, as defined by the US ENERGY STAR program.
